

WPI Wicker Pipe Fork

The **WPI Pipe Forks** are designed for use where a top clamp is not needed. They are excellent for handling large diameter, short pipe. The wide frame gives added stability to your load. The WPI pipe fork is made with high-strength alloy steel which gives it the same strength and dependability as all Wicker Products.

Loader Class	300	400	500	600	700	800
